

Specialists in Multimedia Archiving

Is it time for you to start archiving and modernizing your videos, films, still photographs and slides?

Transferring your multimedia content to DVD will give you the following benefits:

SAVE SPACE

Fit several videos, films, audio files and stills of varying formats onto a single, easy to store disk.

PRESERVE QUALITY

High quality image and sound that won't deteriorate like video.

EASE OF NAVIGATION

Navigation menus, chapter points and timecode allow for instant access to any part of the content.

No more fast forwarding or rewinding!

DVD FEATURES

Crystal clear pausing and slow-motion, the ability to zoom in on areas of the image, personalized menu screens, still image slide shows with narration or music and the convenience of playback on PC's, laptops and standard DVD players are only some of the options and advantages of DVD.

We specialize in transferring personal and corporate multimedia material to DVD, including most video and audio formats, 8mm and 16mm film, still photographs and slides. We use custom encoding and compression techniques to ensure the highest possible quality and compatibility.

Please contact us today or visit our website for further information.
